About this course

This two-day program provides in-depth understanding of the legal obligations under the Environmental Quality Act 1974 and its related regulations. Participants will explore the history, structure, and purpose of the Act, the responsibilities of both employers and employees, and the latest amendments for compliance. Through comprehensive modules and practical discussions, participants will learn to identify relevant regulatory requirements, manage scheduled wastes, industrial effluent, and air pollution, and implement preventive measures to reduce environmental risks. The course ensures readiness in observing legal requirements, preventing non-compliance, and supporting sustainable industrial operations.

Who Should Attend?

The course is suitable for all factory employees, engineers, managers, directors, contractors and maintenance staff.

Learning Outcomes

By the end of this programme, participants will be able to:

1. Demonstrate comprehensive understanding of the Environmental Quality Act 1974 and its related regulations, including Scheduled Wastes, Industrial Effluent, and Clean Air Regulations.
2. Interpret and apply the legal requirements and compliance procedures relevant to environmental protection in industrial and manufacturing settings.
3. Identify, analyze, and respond effectively to environmental risks, ensuring adherence to reporting, monitoring, and documentation standards.
4. Evaluate and implement best practices for pollution prevention, waste management, and air quality control to meet regulatory expectations.
5. Exhibit professional responsibility and leadership in promoting environmental compliance, sustainability, and continuous improvement within their organization.
